

## Tank You!

Yes, that is a real Patton Tank "creating" a compact car! The Tank Museum just north of us in Danville, VA presented their yearly Extravaganza last spring. Among the live displays were weapons and flame thrower demos. They also drive one of their 115+ tanks over something, usually a car. This year they transformed a boat into a surf board, also :)

The museum is open year-round and has a great collection of items, including tanks, 1000's of uniforms, weapons, and other artifacts. There is also an RC tank "field" where they operate model tanks in reenactments of WWII battles. It is worth the trip!
